If you wanted to ruin the economy ... How Would You Do It!

First ... you would need to figure out the best most affordable way to get something accomplished ... and then do the opposite.

Let's look at electricity. Hydro-Electric Power (using dams to control the floods and have the ability to store water and control flows so rivers and lakes don't dry up would be a great place to start. After all, you don't want cheap power. The GOAL is to take more money each month out of everyone's pocket's. Eliminating Nuclear and Hydro-Electric power will raise energy costs tremendously. To be able to do away with those two sources you would have to use Trillions of taxpayer dollars to create more expensive alternatives like solar & wind power products and projects.

Let's look at how to raise the cost of housing. The first step would be to eliminate the availability of lumber products (Put an End to Logging). You would have to totally take control of, and change, the Government agencies that are entrusted to take care of the public lands across the U.S. You would also have to have tight control over the private land as well. By going from the best way to produce affordable building products ... to the absolute worst, such as ending good management of these lands and replace it with the worst management and letting our renewable resources burn ... and letting nature take it's course!

Next month we will deal with how to dramatically raise the cost of fuel and groceries.

Scott

Deschutes County has volunteer positions open to serve the **NEW** Wolf Depredation and Financial Assistance Committee

Is your soil running low on horsepower? Chances are, a loss in humic substances is making it harder for your crops to take up vital soil-applied nutrients year after year. Resurge® is a low-dust granule that delivers humic compounds directly to the soil with a quick release of the highest-quality humic ore source available. Compatible with all types of dry fertilizer, including urea, Resurge's uniform shape and size allow for even distribution throughout the blend and across the acre. That means improved soil quality and health for stronger in-season crop results and yield potential.

Energize your soil, and elevate your crops with Resurge. Contact your local Helena representative or visit HelenaAgri.com for more information.

GERMAN CHOCOLATE BROWNIES!

Ingredients:

Brownie Ingredients:

- 1 cup salted butter, cut into tablespoons
- 4 ounce German chocolate baking bar
- 2 cups granulated sugar
- 4 large eggs
- 2 teaspoons vanilla extract
- ½ teaspoon salt
- 1 cup all-purpose flour, sifted

Topping Ingredients:

- 1 cup granulated sugar
- 1 cup evaporated milk
- ½ cup (1 stick) salted butter, cut into tablespoons
- 3 large egg yolks
- 1 ½ cups toasted coconut
- 1 cup toasted chopped pecans
- 2 teaspoons vanilla extract

Directions:

Brownie Directions:

- Preheat the oven to 350°F. Line a 9x13-inch baking dish with parchment paper and spray with non-stick cooking spray, set aside.
- Place the cut butter into a large pot. Begin to melt the butter over medium-low heat. Break up the chocolate bar into squares and add them to the pot. Stirring occasionally, melt the chocolate with the butter until smooth. Take off the heat and whisk in the sugar until smooth.
- Add the eggs one at a time and whisk them in fully before adding the next.
- Whisk in the vanilla extract and salt.
- Add the flour. Stir it in until fully combined with no dry patches.
- Pour into the prepared baking dish. Bake for 35-38 minutes until a toothpick inserted into the center comes out mostly clean.
- Place on a wire rack to cool completely.

Topping Directions:

- Place the sugar, evaporated milk, butter, and egg yolks into a sauce pot.
- Place over medium-low heat and stir together. Stir occasionally until the butter has melted.
- Bring the mixture to a simmer while still stirring occasionally so nothing sticks to the bottom. Once it begins to simmer and thicken slightly, take it off the heat, (about 12 minutes).
- Add the coconut, pecans, and vanilla extract. Stir it in to combine. Continue to stir until it becomes thickened and spreadable (about 5 minutes).
- Pour the frosting on top of the brownies and smooth it out. Let it cool completely.
- Cut into bars, if using, serve immediately.

Jennifer
